

This leaflet answers some basic questions about first-aid provision at work.

It is aimed at employers in small and medium-sized enterprises, but may be useful to all employers, managers and others involved in first aid.

### on: What is first aid at work?

People at work can suffer injuries or fall ill. It doesn't matter whether the injury or the illness is caused by the work they do or not. What is important is that they receive immediate attention and that an ambulance is called in serious cases. First aid at work covers the arrangements you must make to ensure this happens. It can save lives and prevent minor injuries becoming major ones.

# O2: So what do I need to do?

The Health and Safety (First-Aid) Regulations 1981 require you to provide adequate and appropriate equipment, facilities and personnel to enable first aid to be given to your employees if they are injured or become ill at work.

What is adequate and appropriate will depend on the circumstances in your workplace and *you should assess* what your first aid needs are (see Q3).

The minimum first-aid provision on any work site is:

- a suitably stocked first-aid box (see Q4);
- an appointed person to take charge of first-aid arrangements (see Q5).

It is also important to remember that accidents can happen at any time. First-aid provision needs to be available at all times people are at work.

# What should I consider when assessing first-aid needs?

Many small firms will only need to make the minimum first-aid provision. However, there are factors which might make greater provision necessary. The following checklist covers the points you should consider.

## Aspects to consider

- 1 You are required by law to make an assessment of significant risks in your workplace. What are the risks of injury and ill health identified in this risk assessment?
- 2 Are there any specific risks, eq working with:
- hazardous substances;
- dangerous tools;
- dangerous machinery;
- dangerous loads or animals?
- 3 Are there parts of your establishment where different levels of risk can be identified (eg in a University with research laboratories)?
- 4 What is your record of accidents and cases of ill health? What type are they and where did they happen?
- 5 How many people are employed on site?
- 6 Are there inexperienced workers on site, or employees with disabilities or special health problems?
- 7 Are the premises spread out, eg are there several buildings on the site or multi-floor buildings?
- 8 Is there shiftwork or out-of-hours working?
- 9 Is your workplace remote from emergency medical services?
- 10 Do you have employees who travel a lot or work alone?
- 11 Do any of your employees work at sites occupied by other employers?
- 12 Do you have any work experience trainees?
- 13 Do members of the public visit your premises?

If the risks are significant you may need to employ first aiders (see Q6 and Q7).

You will need to consider:

- specific training for first aiders;
- extra first-aid equipment;
- precise siting of first-aid equipment.

You will probably need to make different levels of provision in different parts of the establishment.

You may need to:

- locate your provision in certain areas;
- review the contents of the first-aid box (see Q4).

You may need to employ first aiders (see Q6 and Q7).

You will need to consider:

- special equipment;
- local siting of equipment.

You will need to consider provision in each building or on several floors.

Remember that there needs to be first-aid provision at all times people are at work.

You will need to:

- inform local medical services of your location;
- consider special arrangements with the emergency services.

You will need to:

- consider issuing personal first-aid kits and training staff in their use;
- consider issuing personal communicators to employees.

You will need to make arrangements with the other site occupiers.

Your first-aid provision must cover them.

You have no legal responsibilities for non-employees, but HSE strongly recommends you include them in your first-aid provision.

# O4: What should I put in the first-aid box?

There is no standard list of items to put in a first-aid box. It depends on what you assess the needs are. However, as a guide, and where there is no special risk in the workplace, a minimum stock of first-aid items would be:

- a leaflet giving general guidance on first aid eg HSE leaflet Basic advice on first aid at work (see 'Where can I get further information?');
- 20 individually wrapped sterile adhesive dressings (assorted sizes);
- two sterile eye pads;
- four individually wrapped triangular bandages (preferably sterile);
- six safety pins;
- six medium sized (approximately 12 cm x 12 cm) individually wrapped sterile unmedicated wound dressings;
- two large (approximately 18 cm x 18 cm) sterile individually wrapped unmedicated wound dressings;
- one pair of disposable gloves.

You should not keep tablets or medicines in the first-aid box.

The above is a suggested contents list only; equivalent but different items will be considered acceptable.

# O5: What is an appointed person?

An appointed person is someone you choose to:

- take charge when someone is injured or falls ill, including calling an ambulance if required;
- look after the first-aid equipment, eg restocking the first-aid box.

Appointed persons should not attempt to give first aid for which they have not been trained, though short emergency

#### O6: What is a first aider?

A first aider is someone who has undergone a training course in administering first aid at work and holds a current first aid at work certificate. **The training has to have been approved by HSE**. Lists of first-aid training organisations in your area are available from HSE. You may decide, following your first-aid assessment, that you need one or more first aiders. A first aider can undertake the duties of an appointed person.

# How many first aiders or appointed persons do I need?

It is not possible to give hard and fast rules on when or how many first aiders or appointed persons might be needed. This will depend on the circumstances of each particular organisation or worksite. Refer to the following table after working through the assessment checklist in O3. It offers suggestions on how many first aiders or appointed persons might be needed in relation to categories of risk and number of employees. The details in the table are suggestions only - they are not definitive nor are they a legal requirement. It is for you to assess your first-aid needs in the light of your particular circumstances.

## OB: Do I have to do anything else?

You have to inform your employees of the first aid arrangements. Putting up notices telling staff who and where the first aiders or appointed persons are and where the first-aid box is will usually be sufficient. But don't forget that you will need to make special arrangements to give first-aid information to employees with reading or language difficulties.

Where there are special circumstances, such as remoteness from emergency medical services, shiftwork, or sites with several separate buildings,

Category of risk	Numbers employed at any location
Lower risk	-
eg shops and offices, libraries	Fewer than 50
	50-100
	More than 100
Medium risk	
eg light engineering and	Fewer than 20
assembly work, food processing,	20-100
warehousing	
	More than 100
Higher risk	
eg most construction, slaughter-	Fewer than five
houses, chemical manufacture,	5-50
extensive work with dangerous	More than 50
machinery or sharp instruments	

there may need to be more first-aid personnel than set out below. Increased provision will be necessary to cover for absences.

# Suggested number of first-aid personnel

At least one appointed person
At least one first aider
One additional first aider for every 100 employed
At least one appointed person
At least one first aider for every 50 employed
(or part thereof)
One additional first aider for every 100 employed
At least one appointed person
At least one first aider

One additional first aider for every 50 employed

# 09: Where can I get further information?

Lists of first aid training organisations are available from: The Health and Safety Executive, First Aid Approvals and Monitoring Section, Grove House, Skerton Road, Trafford M16 ORB Tel: 0161 952 8322/8326/8280.

This leaflet is available in priced packs of 15 from HSE Books, ISBN 0 7176 1074 8. Single free copies are also available from HSE Books.

The free leaflet *Basic advice on first aid at work* (INDG347, 2002) is published by HSE Books. It is also available in priced packs of 20, ISBN 0 7176 2261 4.

More detailed practical guidance on complying with your first aid at work duties has been published by the Health and Safety Commission First aid at work. *The Health and Safety (First Aid) Regulations 1981. Approved Code of Practice and guidance* L74 HSE Books 1997 ISBN 0 7176 1050 0.

HSE priced and free publications are available by mail order from: HSE Books, PO Box 1999, Sudbury, Suffolk CO10 2WA Tel: 01787 881165 Fax: 01787 313995 Website: www.hsebooks.co.uk HSE priced publications are also available from good booksellers.

For other enquiries ring HSE's InfoLine Tel: 08701 545500, or write to HSE's Information Centre, Broad Lane, Sheffield S3 7HQ. Website: www.hse.gov.uk

This leaflet contains notes on good practice which are not compulsory but which you may find helpful in considering what you need to do.
